Global health systems: Innovations for the frail elderly

Cameron D. Norman PhD MDes CE
Senior Researcher, Ivey International Centre for Health Innovation
Health Systems Today

• Health systems “touch” people during times in their lives which are life changing

• Health systems focus on the disease or diagnosis, not about the person, not about what matters

“It is more important to know what sort of person has a disease than to know what sort of disease a person has”  -Hippocrates

Ivey International Centre for Health Innovation
CHANGE THE MODEL
Personalization

Personalization is about achieving health and wellness unique to each person, community, population.
The Empowered Consumer

The “Passive Patient” is now the empowered consumer
Democratizing Health & Care

DEMOCRACY IS NOT A SPECTATOR SPORT
Caring...by design
Designing spaces for health
– from clinics to homes to cities to systems
Systems thinking about health and wellness
